

# ALGER

## Automatic Slow Down Wheel

- Automatically decelerates when encountering a slope
- Increases security
- Suitable for a variety of applications requiring wheels
- **Invention patent pending**

WE LOVE AND WE CARE

# Drawbacks of Existing Wheels

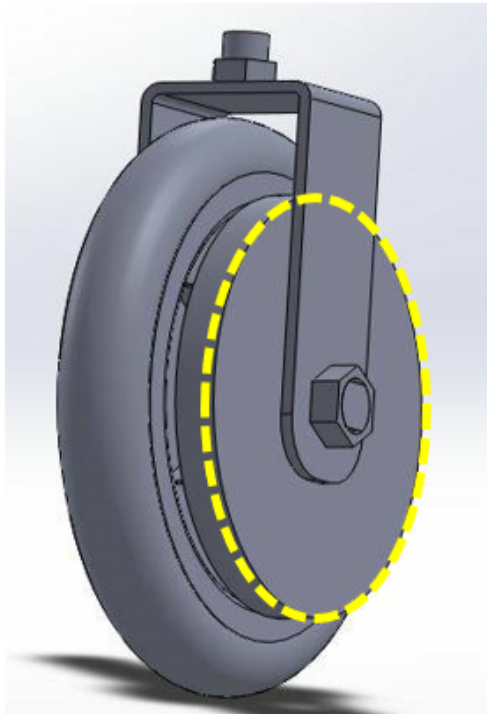

## ⌘ Existing Wheels

**Security  
Risks**

When encountering a slope, there is often a risk of losing speed control due to slow or unnoticed user response!

# Advantages of Alger's Wheels

## Applications:

- Walkers
- Strollers
- Wheelchairs
- Shopping Carts

**Increases  
Security**

⌘ Invention patent pending  
Counterfeiting not allowed

This product is equipped with a special deceleration mechanism (as shown by the yellow dotted line above), when the wheel encounters a slope, the deceleration element in the mechanism activates to slow down the wheel. This can lower the risk of losing speed control caused by the user's slow response or inattentiveness!
